

Transmission Adjustment Clause

Application

The Transmission Adjustment Clause (TAC) applies to all rate schedules specifying that Rate Schedule TC applies to that schedule.

Computation of the TAC

The TAC on a per kilowatt hour basis is equal to the sum of the following: Projected allocated billings from the Northern Maine Independent System Administrator (NMISA) (N) and projected transmission wheeling costs charged by Maine Public Service Company (MPS) (M) plus the reconciliation adjustment (R) divided by the estimated kilowatt hours delivered (S) for the period covered.

$$TAC = \frac{N+M+R}{S}$$

And where R consists of the difference between the prior years actual costs and the amount recovered through the TAC in that year plus correction of errors or erroneous reporting.

Method

The TAC will be a monthly charge for a twelve month period beginning January 1<sup>st</sup> with annual reconciliation.

Adjustment of the Monthly Recovery Level

The monthly recovery level as determined for the period beginning January 1<sup>st</sup> is subject to monthly adjustments.
